

Our esteemed CHMM colleague, Bruce Campbell has entered a new chapter of his life, having retired from his admirable career. Bruce earned a BS in Math and Physics at Missouri State University, and a MS in Atmospheric Science at Texas Tech. He earned his CHMM in 2006 and joined our DFW AHMP Chapter shortly after that. Bruce encouraged others to obtain their CHMM credentials and participated in the DFW Chapter meetings, including his favorite chapter outreach - the judging exhibits at the Dallas Science Fair. He also supported the DFW Chapter by serving as Vice President, President, Treasurer, and Member at Large, and we are grateful for his service.

Bruce plans to continue pursuing his personal passions, in the company of his beloved wife. These include biking, bird watching, world travel, and astronomy. As an atmospheric science expert, Bruce shares with us one of his favorite atmospheric splendors.

Bruce leaves the baton at American Airlines in the capable hands of his colleague, Casey Bramwell. We congratulate Casey and wish him the best of success.
